

Fair Play – TOP 4 in 3 categories this year

Where wood is chopped, splinters must fall. After multiple routinely recounting of our jury votes we noticed a mistake that influences the nomination at three points. The competition process would request to take back the nomination of three projects. That did not feel right in this case. Our mistake should not lead to a disadvantage for our applicants here. After consulting our arbitration board as well as all people concerned we came to a **Fair Play** solution for that particular case. Fair Play means more than just standing to the rules. In the end we are all trying to make the world a bit greener. That is why we are happy to have 4 nominees in the categories Recycling & Resources, Energy and Lifestyle. The solution we have found here does not have any binding effect for future cases neither does it set any prejudice.

We would like to thank BDI – BioEnergy International AG, ebm-papst Mulfingen, pydro GmbH, PPACKS Sales GmbH, Epson Deutschland GmbH, REMONDIS SE & Co.KG, biobrush UG, Tumaly GmbH & Co. KG, myBoo GmbH, neocomp GmbH, Thriving Green und OEEX GmbH for their Fair Play.

Marco Voigt and Sven Krüger, initiators of the GreenTec Awards
